20 S. Palafox Street, Pensacola, Fla.

**TERSELY TOLD.**

Theodore Pfeiffer leaves to-day for an extended tour of the north and west. His trip will include Denver, Colo., where he may possibly locate.

Capt. Wm. Hays returned yesterday morning from the north where he has spent the past several months in the Great Lakes region. Capt. Hays is looking well and it is evident that his trip has been very beneficial to his health.

D. Hale Wilson has returned from Buena Vista, Va., where he went several weeks ago to visit his father. Mr. Wilson intended staying until the middle of October, but when he learned of the existence of fever in Pensacola he came home immediately to give what assistance he could in battling with the disease.

A letter received from Hon. J. M. Muldon, who is now with his family at the Waldorf-Astoria, New York City, announces that he will return to Pensacola about the middle of the month. He had not intended returning before the latter part of September or the first of October, but on account of the yellow fever situation here he will cut his stay short and return earlier.

Get Blue Ribbon Lemon and Vanilla Extracts. You'll be delighted with the "Blue Ribbon Flavor."

Low rates at Southern Hotel for rooms and board.

**NO NEWS RECEIVED FROM THE STEAMER TARPON**

No news was received yesterday from the steamer Tarpon, which was refused a landing at Carrabelle and Apalachicola. It was expected that some word would be received from the steamer during the day, and also that Dr. Porter would set a reply to his telegram to Governor Broward in which the governor's attention was called to the violation of the laws by the people of Carrabelle and Apalachicola by refusing the Tarpon a landing.

The supposition is that the steamer is still at anchor awaiting advice from the owner and authorities.

**COLD KILLS THE GERM.**

Lieut. Perry Says There Are No Bait Heads in the Arctic Region.

The people who come back from Klondike testify to the fact that no native bald heads are there. The evidence is that the cold climate kills the germs that eat the hair off at the roots. Lieut. Perry, who went to the Arctic Regions, gives the same evidence. Newbro's Herpicide has the same effect as the cold climate. It kills the germ that eats the hair off at the roots, and the hair grows again. Herpicide is the first hair remedy built upon the principle of destroying the germ that eats the hair off. Its phenomenal side demonstrates the correctness of the scalp germ theory. Sold by W. A. D'Alemberte, druggist and apothecary, 121 S. Palafox street, Pensacola, Fla. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

## NURSES SHOULD BE PROVIDED FOR SICK

Excellent Suggestion Made for Provision of Much Needed Help at This Time.

Editor Pensacola Journal:

It is very evident that a serious condition, and not a theory, confronts this community, and it appears to me that the wise thing to do is to take steps to meet it. I have heard that at least one death has been due, to some extent, to lack of proper nursing and attention at the critical period.

This should not be the case, and it is a blot upon a supposed Christian community. I have not heard of any steps having been taken to look after such cases needing careful nursing, except the offer of the State Board of Health to furnish nurses where needed. It seems to me that there should be a citizens' committee to look after and assist such cases, and to furnish care and attention to those needing it.

I would suggest that the mayor or the Chamber of Commerce call a meeting early in the next week for the purpose of organizing for the relief of those needing intelligent nursing and attention. While not a professional nurse, I have nursed yellow fever patients, and I am willing to do so now, and I know there are many men in this good city of ours who will gladly and cheerfully do this for the relief of our fellow-men.

H. S. WHITE.

(Mr. White's suggestion is an admirable one, and we trust it will be acted upon at once. Proper nursing is probably the most important part in the result of fever treatment, and no case in a city of Pensacola's size and ability should be lost for lack of it.—Editor Journal.)

## PINEWOOD

Special to The Journal.  
Pinewood, Sept. 9.—We have been having plenty of rain and hot weather. Mrs. P. L. Rosasco and children and Miss Annie Wheat, are spending a month in the mountains of Tennessee.

Capt. Albino is able to be out again after a severe attack of rheumatism.

Some of our inhabitants became frightened when it was reported that yellow fever existed in Pensacola, and from the way they went to laying in provisions, you would think that no more was to be had.

Mr. Chas. Henderson, an expert sawyer, is now holding the lever at the mill. Charlie is a swift article.

Mr. Will McCombs, the lumber marker, is out again after a siege of fever.

The Bay Point Mill Co. have a large supply of logs on hand now, insuring plenty of work for a long time to come.

Fishing is very good here now. This is not an invitation for refugees, as we do not need them just at present, as the people have been frightened bad enough already.

It is rumored that the wedding bells will soon be ringing in our little village.

## BETTER RECORD FOR YESTERDAY

(Continued from First Page.)

the country were the first ones to kick when the rules were applied to themselves, and they were prevented from coming to the city.

When it was learned yesterday that the line of quarantine had been extended and that permits would be revoked, there was a big rush for the city, in order to get on the inside before the rule went into effect. This was mainly by merchants and clerks, who had taken their families outside the city limits.

### All Patients Convalescent.

All of the yellow fever patients are convalescing, with possibly one or two exceptions. The mild form of the disease is clearly shown by the quick recovery of the most of those who have been attacked. The only patient who is at all in a dangerous condition is that of Mr. Burke at the Park Hotel.

### Providing for Hospital.

The screening of the ward secured from St. Anthony's hospital is now going ahead rapidly, and it is expected that it will be ready for use within a day or two. The place will be in thorough condition for the treatment of patients, and will be under the supervision of State Health Officer Porter, who is in charge of all matters pertaining to quarantine. In fact Dr. Porter will have personal charge of this branch, leaving his assistants to attend to outside business and to suspicious cases.

### Very Little Sickness Here.

Pensacola is in an excellent condition, so far as sickness is concerned, and if the fever does not increase during the next few days, there will be less disease here than at any time previous in many years. The city is now in an excellent sanitary condition. In fact it is better than has been known for many years.

### Analysis of Spread.

An analysis of the spread of the fever shows that on August 23 and 24 the first three cases were discovered. The infection period of these cases included August 23, 24, 25 and 26. Allowing

## THAT TAMPA WATER CASE

Man Who Shut Off Citizen's Supply Was Fired By the Water Company.

The Tampa Times says: G. E. Beach, who has been in the employ of the Tampa Water Works Company for some time past in the capacity of inspector, was discharged by Superintendent McFarland this morning.

Mr. Beach is the man who cut off the water at the residence of Vincente Ghera yesterday morning, which incident was discussed in yesterday afternoon's issue of the Times.

A Times man had a talk with Mr. Beach this morning. He stated that yesterday morning he was instructed by Orin McFarland, son of the superintendent, to go to the Ghera residence and cut off the water, being at the same time given a bill showing that the charges had not been paid for the past quarter. It is customary under such circumstances to permit the customer to pay up if he desires to do so and leave the water supply on. Beach asked if he should accept payment from Mr. Guerra, if offered, and he was told to "say nothing, but cut the water off." He went to the residence with a negro helper and was cutting off the water when a lady came to the door and asked him what he was doing. He told her, and she said nothing more but went back to the house. Then several children came out and one of them asked the negro what they would drink if the water was cut off. The negro asked the boy if he did not drink beer and wine. The boy answered affirmatively and Beach says he remarked: "Then guess you can drink beer or wine." The lady at this time reappeared at the door and called the children away.

When Beach went to the office at 7 o'clock in the afternoon he was shown the article in the Times by Orin McFarland and told to go to the Guerra residence at once and turn on the water again, which he did. This morning when he went to the office Superintendent McFarland asked him if he used the expressions quoted in the Times. He made a statement to the superintendent similar to that given to the writer this morning, and at his conclusion the superintendent remarked: "Well your talk has cost you your job." The young man was given a check to date and left. While it appears that he was decidedly indiscreet in the language used, at the same time he seems to be made the scapegoat for a mistake made by the company. There is little doubt that the action of the company in ordering the water cut off was in retaliation for the interview with Mr. Guerra which appeared in Tuesday's issue of the Times.

In this connection, however, in just

twelve days for the mosquitoes that stung these patients to digest the poison brings the date to the 3rd, 4th, 5th and 6th of September, when the infected mosquito can transmit the disease. As it requires from two to five days for the disease to develop after the bite of the mosquito, the date of the development of the disease is thus advanced to Sept. 5th, 6th, 7th, 8th and 9th.

The present developments and the analysis of the development of the disease conclusively proves that the yellow fever experts are correct in their theory of its transmission.
